

Classification in the Era of Personalised Medicine: Perspectives from History, Philosophy and Policy

Workshop, 22 July 2019, 9.30-16.30 h

This workshop brings together experts from philosophy, history and health care policy to discuss the functions that population and disease categories can fulfil in an era of personalised medicine. Our focus will be on how the adequacy of these classifications can be conceptualised, contextualised, assessed and justified.

Programme:

- | | |
|-------------|--|
| 09.30-10.00 | Arrival and coffee |
| 10.00-10.30 | Welcome and introduction "Scoping Medicine"
Lara Keuck (Humboldt-Universität zu Berlin) |
